Profile

I'm a new physics graduate who loves technology. Last year I was an intern at an AI team where I helped developing and implementing recommender systems. Then I realised I wanted to pursue a career in Machine Learning, Data Science or a related field.
I consider myself a hard-working and easy-going person that can quickly get adapted to new working groups and environments.

Work experience

Intern **06/2019 – 12/2019**
everis, Zaragoza, Spain
Internship at the Artificial Intelligence team, part of the SKM project (everis knowler). I learnt how to manage, clean and process big amounts of data and then I worked on different recommender systems to find the one that offered the best results for the company.

Education

Physics **01/2020 – 06/2020**
Kaunas University of Technology, Kaunas, Lithuania
6 months exchange with the Erasmus program.

Physics **09/2014 – 12/2019**
Universidad de Zaragoza, Zaragoza, Spain
Final thesis on neural networks solutions for the quantum many-body problem.

Web developing **06/2018 – 08/2018**
Hiberus Tecnología, Zaragoza, Spain
I was taught in ASP .NET Core, making use of C#, MySQL, HTML 5, CSS. Also took an introduction to Angular 6 for a few weeks.

Skills

Languages		Programming languages	
English	Professional	Python	<div><div></div></div>
Spanish	Native	C#	<div><div></div></div>
		SQL	<div><div></div></div>
		C/C++	<div><div></div></div>

Certificates

Certificate in Advanced English (CAE)
06/2014
Cambridge University

Deep Learning Prerequisites: The Numpy Stack in Python
06/2019
Udemy
UC-RBOKSNBN

How Google does Machine Learning
